Cubit Advanced Tutorial

When: **Thursday, April 13, 2006**
Time: **8:30am – 4:30pm**
Where: **Building 980, Room 95**
Cost: **Free**
Enroll: **Contact Lydia Koch, lkkoch@sandia.gov or 284-1783**

A <u>one-day</u> advanced course using the finite element mesh generation tool, Cubit, will be offered on Thursday, April 13, 2006 at Sandia's New Mexico site. The Advanced Cubit Tutorial will offer hands on experience with some advanced features of Cubit. The course will cover mesh quality, smoothing, and modification in depth. It will also cover geometry modification and cleanup.

The course assumes a high level of familiarity with Cubit. Bring your own problems to discuss with the class and be prepared to help others with their problems as well. This course will be similar to tutorials offered in the past.

A one-hour no-host lunch break will occur at noon.

NOTE: This will be a "Bring Your Own Computer" training course although a limited number of computers will be available for students who cannot bring a laptop to the class.

Please circulate to whomever may be interested!
